International Scientific Conference:

Turning Green into Blue
Algae-Driven Innovation for Circular Greenhouse Production and Aquatic Sustainability

ORGANIZED WITHIN THE PROJECT BSB00091 - ALGAEREVIVE

Harnessing Algae Power for Pollution Reduction and Blue Growth | Interreg NEXT Black Sea Basin Programme 2021-2027

Date

2-4 December 2026

Location

ELGO – DIMITRA, Thermi campus
Thessaloniki, Greece

The conference will bring together researchers, practitioners and stakeholders to exchange knowledge, recent scientific results and discuss innovative algae-based approaches for ecosystem remediation, pollution reduction and sustainable blue growth.

TOPICS

- Scientific approaches to ecosystem remediation
- Innovation and sustainability in the blue economy
- Blue growth and sustainability
- Algae and climate change
- Algae as renewable resources
- Marine pollution: assessment, monitoring and mitigation

ABSTRACT SUBMISSION

Abstracts should include the title, author(s), affiliation(s), keywords and a concise description of the objectives, methodology and main results. Acknowledgements and references may also be included where relevant.
